

**All Weather CrownCoat
and ChimneySaver
A Powerful Combination**

Chimneys are highly exposed to the element and, if left unprotected, are susceptible to deterioration. A complete chimney protection program should include repairing the crown with All Weather CrownCoat, as well as waterproofing the entire chimney with ChimneySaver Water Repellent. All flue tiles should have a chimney cap to further prevent water penetration. This combination is your best defense against major reconstruction.

- **Can Be Applied Below Freezing**
- **10 Year Warranty**
- **Permanently Flexible**
- **Natural Concrete/Mortar Appearance**
- **Environmentally Friendly**

All Weather CrownCoat™

10 YEAR LIMITED WARRANTY

SaverSystems warrants that All Weather CrownCoat, when used to coat or repair masonry chimney crowns, will remain intact and in place for 10 years from the date of application when properly applied by a professional contractor to a residential chimney crown according to label instructions. This warranty does not cover spalling, abrading, faulty construction and/or other defects which might erode coated surfaces.

If All Weather Crown Coat fails to perform as specified, SaverSystems will furnish, as sole remedy, enough product to correct the condition. This warranty does not include labor or cost of labor for the application of All Weather CrownCoat. SaverSystems shall not be liable for incidental or consequential damages resulting from any breach of this warranty and fitness for use. Some states do not allow the exclusion of incidental or consequential damages, so the above exclusions may not apply to you. This warranty gives you specific legal rights. You may also have other rights which vary from state to state.

All Weather CrownCoat™

Make Repairs to Damaged Chimney Crowns All Year Long

Maximum Protection -- Guaranteed to Last

What is a chimney crown?

A chimney crown is a masonry roof that covers the top of your chimney. It prevents water from seeping into the masonry below. Water damaged or cracked chimney crowns can lead to costly chimney repairs.

Visible Signs of Damage Include...

- Cracking of the crown
- Cracking of the brick
- Spalling (flaking) of brick
- Deteriorating mortar joints
- Efflorescence (white stains)

The crown solution.

All Weather CrownCoat is a flexible waterproof sealant that is applied over the entire chimney crown. A professionally installed All Weather CrownCoat application stops further water intrusion through the crown and carries a 10 year warranty.

Before

After

When water penetrates through cracks in your crown and freezes, it expands, deteriorating your chimney's crown and the masonry below it. Preventing water damage to your chimney will save you thousands in expensive repairs.

Putting off this repair until warmer weather means further damage to your chimney. All Weather CrownCoat is a tough elastomeric coating that can be applied all year long, and will even cure in temperatures below freezing. This allows you to stop further water damage, even in the winter months.
